

1st September 2010 Up Date

Hello Everyone,

Dunlop Targa

We are now into the last month before entries close and there has been a flurry of activity over the last couple of days. Mandy is still processing entries and we will get the updated entry list up on the website by the end of this week, so if you are up for the challenge then get your entry in, or if you know anyone who is not on the list give them a hurry up.

I have just received an email from Paul Mullan's about the new in-car cameras after he used them at Quit Targa West in Perth last week, so here's what he had to say.

Peter,

FYI we had a serious test of the new onboard units we have recommended for Targa NZ Competitors this past week with Quit Targa West. We had a total of 12 of these units and they all returned great pictures with little or no fuss for co-drivers looking after them. They are certainly the most efficient and cost effective broadcast compatible camera on the market in terms of ease of use and quality of picture and sounds.

Thought you might want to pass this on to those who were thinking of purchasing one. Check out the distributor's website www.racerecall.com.au and check out their rally pack. Ours is an upgrade of this with 2 x 8gb cards and longer extension bar for most flexible use in Targa Rally cars. If you want to purchase the Black Magic Targa Kit direct from Race Recall that's fine too but specify the Black Magic Targa Kit and ensure you get the two cards and longer extension bar.

Will be in touch, Cheers.

Paul can be contacted on the following number, Mob: +61 407 996 666 or email paul@blackmagic.com.au or through the website www.blackmagic.com.au . Remember that Paul is coming over on the 18th September and can bring any prepaid orders with him. This is the best way to get one at the right price and give you plenty of time to learn how to use it.

A full newsletter will be sent on Friday.

Regards,

Peter and the Targa Team.
